Product introduction

From the current living habits, many environmental factors can harm human skin, such as sunshine, environmental pollution, poor air quality, radiation pollution, cosmetics pollution and other factors leading to excessive secretion of skin oil.

Blackhead is actually the oxidation of excessive keratin and sebum in our skin and pore. If we do not pay attention to the usual facial cleanliness or incomplete cleanliness, blackhead, acne and grease secretion are excessive. Vacuum negative pressure pore cleaner is a cosmetic and skin care instrument which integrates many functions such as compact, blackhead removal, acne removal, grease and pore cleaning. This vacuum negative pressure pore cleaner adopts professional academy-level blackhead removal technology, generates vacuum negative pressure suction on the contact surface, cooperates with replaceable multiple cosmetic heads, deeply absorbs blackheads and excess oil secretions, and can also remove them. Kernel, delicate skin, reduce fine lines, give you a very good skin beauty experience!

Product introduction

Specification

- Product Size: 192mm*46mm*30mm
- Output Voltage: 3.7V
- Battery Type: Lithium Battery
- Charging way :USBBattery
- Capacity: 400 mA
- Output Power: 3w
- Texture of material: ABS
- weight: 190g

Qualified
